OPPORTUNITIES

Higher quality seeds, fertilizers, and other agricultural inputs and new technology such as spraying machines, pest identification drones, cold storage systems, and other equipment and training – would greatly benefit the agriculture sector, which is only slowly becoming modernized.

The presence of an increasing number of plantations also creates opportunities for the establishment of processing plants to add value to basic products for export and domestic consumption. With Cambodia trying to diversify its export market, food safety technology has been in great demand.

With limited application of the Sanitary and Phyto-Sanitary (SPS) measure, a significant number of Cambodian products continue to be excluded from export markets due to poor hygiene in handling or other contaminations.

“**SUB-SECTOR
BEST PROSPECTS**”

There is significant potential to expand the production and processing of high yield varieties of rice, cassava, sugarcane and other crops. Several investment projects in mango and vegetables are underway.

CAMBODIA QUICK FACTS

Population: 16.8 million

GDP: \$ 29.6 billion

GDP per capita: \$ 1765.4

FDI Inflow: \$ 3.6 billion

OVERVIEW

Agriculture remains the backbone of Cambodia's economy 80% of its population lives in rural areas and depends primarily on agricultural production for food supply, family income, and livelihood. Cambodia has ample potential for agricultural development, and experience shows that it can produce quality foods for both domestic and export markets.

Programs including USAID's Feed the Future Harvest II work to boost commercial production of horticulture products – including mango, cashew nuts, and pepper. Besides, CAST (Commercial Agricultural for Sustainable Trade) is a USDA Food for Progress project designed to develop a lasting aquaculture industry in Cambodia to help meet the growing demand for animal and aquaculture-sourced protein. The country's aquaculture industry demand for soybean protein is projected to reach 100,000 metric tons per year by 2030.

EXHIBITOR PROFILE

Agrochemicals & Crop Protection Productst

- **Agriculture Chemicals:** Chemical Pesticides & Intermediates (Pesticides, Bactericides, Technologies, Herbicides, etc), Biopesticides, Ecological Pesticides, Agriculture Chemical Production & Processing.

- **Chemical Fertilizers**

- **Crop Protection & Biotechnology:** Plant Growth Regulators, Transgenic Products, Soil Additives, Nutritional Agents, Turf.

Agriculture Products

- Rice, Seeds, Orchid, Vegetables, etc.

Agriculture Mechanical Equipment

- Agriculture Mechanical Accessories.
- Fertilization Related Mechanical Equipment.
- Agrochemical Product Production Equipment.
- Agriculture And Sideline.
- Product Processing.
- Forage Choppers.
- Electronics/ Precision Farming/ Agricultural Software.
- Storage And Conservation Of Harvest Products.

- Agriculture Plastic Products.
- Components/ Spare Parts.
- Transport Vehicles/ Logistic.
- Environment Protection Equipment.
- Spray/ Irrigation/ Sprinkler Irrigation Equipment.
- Waste Water And Waste Residue Treatment, Technologies And Equipment.
- Used Machinery Trade.

VISITOR PROFILE

- Agrochemical wholesalers & Retailers.
- Chemical Products Importers & Exporters.
- Mass Agrochemical Product Users.
- Mass Agrochemical Technology Users.
- New Agriculture Product & Technology Applied Organizations.
- Terminal Users of New Agriculture Products & Technology.
- Farmers, Agriculturists & Agronomists.

- Entrepreneurs, Farm Contractors.
- Engineers & Technicians.
- Investors and Bankers.
- Registration Agency and Consultant Agriculture Department.
- Agro Producers.
- Universities and Research Institutions.
- Government Representatives.
- Related Correlative Enterprises & Organizations.
